(Note 1) Satellite Delivered Distance Learning Service - Satellite delivered telecommunications service, provided over a VSAT satellite network operated by HITN and licensed by the FCC as a common carrier, connecting the customer school/library with other institutions with facilities to originate distance learning services. The service provides a video communication path capable of transporting a video and associated audio signal from the originating earth station uplink point to the customer, together with a return path from the customer's School/Library capable of transporting voice and/or data communications to the earth station downlink point. Included in the service is the right to use certain on-premises equipment which is necessary to receive the service consisting of a transmit/receive dish antenna and the following equipment owned by HITN during the term service is taken

- Solid state power amplifier (SSPA) - 5 Watt for C-band
- Low noise amplifier (LNA)
- Block up/down frequency transistors
- Broadband synthesizer for full satellite tuning
- Full duplex BPSK or QPSK satellite modem including L-band to baseband IF conversion
- Satellite terminal that is quick and easy to install
- Single interface cable assembly
- Standard waveguide interface

The customer school/library shall have no option to purchase the on-premises equipment which shall be maintained by HITN and returned to HITN at the end of the service term. The customer shall not use the on-premises equipment for any purpose other than the receipt of service provided by HITN. The service includes only the basic telecommunications circuit to a maximum of 20 hours per month and does not include end user equipment or any content to be provided over the circuit.

 Mr. Valentin & Ms. Simon -

I wish to present you with a complete listing of your applications currently under review and the issues that we need supplemental information on to allow the completion of these applications. Since there has been a lengthy volume of email and faxed letters requesting different pieces, I thought it best to attempt putting all the issues down on one listing.

This is the most up to date list of the issues still unresolved:

A-please answer questions in regard to the Remote Access Routers.
 I have attached this onto this note.

B-I will be needing more detail for the following HITNet services:

- Internet Access Quote, Installation detail: as explained to you during my email dated 9-6.
- I also need the Make and Model number for the following equipment:
 - Wireless Router
 - Communications Service
 - File & DNS Server
 - Wireless LAN

In some cases, our database differs with your application in respect to the discount rate for certain regions. I have highlighted the libraries where there's a discrepancy in discount rate and next to it i've listed the SLD discount that region is eligible for. As you know, an applicant has two options to consider when faced with a discrepancy :

- present us with the discount documentation you utilized to present the discount rate for the region, which entails providing the matriculation and free/reduced eligibility figures for each school in the region.

-chose to accept SLD's database percentages

Please note that some of these issues are not new, that I just wanted to provide a recap of all the issues surrounding these applications. Please note that as per program rules, all responses to information requests must be faxed into our office within 7 calendar days, that is, on September 13th, these applications will be processed with the supports then available.

Also please note the attached listing of applications currently under review and the Remote Access Router Questionnaire.

Annex A Services Description 2nd Further Supplemental Information

Installation & Configuration of Dedicated Internet Services Connectivity (Breakdown)

Set Up Charge per New Customer (\$800) – Programming of the router and communications server of the institution with an IP address and the specific HITNet network configurations.

Network Configuration/Integration and Testing (LAN and Satellite) (\$2,000) – Programming and network configuration between the router, the network servers and each end user terminal on the LAN for use with the Dedicated Internet Access Service. Each piece of equipment must be integrated, tested and certified as fully functional on the network with each network device and for use with the with Dedicated Internet Access Service.

Training and Documentation (\$200)– This is basic instruction of the relevant network maintenance contact at each institution on the use of the equipment associated with the *Dedicated Internet Access Service*. A technical manual is provided that includes an equipment diagram for the institution and instructions for use.

Monthly Recurring Charge for 2Mbps HITNet High Speed Internet Access Service = \$3,250

HITNet High Speed Enhanced Wireless Router (Make and Model Number)

HITN Satellite Internet Router 7000 Series

Communications Server (Make and Model Number)

HITNet Communications Server PR-933 Pentium III Comm Server – includes 256MB SDRAM, 133 MHz, 3x18 GB Hard Drive RAID 5 System, 3.5" Floppy Drive, 32x CDRom, 14" monitor and operating software.

File and DNS Server (Make and Model Number)

HITNet File and DNS Server PR-933 Pentium III, 256MB SDRAM, 133 MHz, 3x18 GB Hard Drive, RAID 5 System, 3.5" Floppy Drive, 32x CDRom, operating software

HITN Wireless LAN (Make and Model Number)

Base Station – Clearwire 2400

Remote Radio – Clearwire 2470

Attach: tennessee.doc; colegios privados.xls; Remote Access Router.tif
Subject: Private Schools currently under review.

Ms. Valentin and Ms. Simon -

I have attached a list schools currently under the initial review process. As examine the supporting documentation that has been submitted for applications, specifically Annex A from HITN, I find a few requests that I need supplemental information.

- High speed enhanced wireless router system . I need to see a detailed, listing of components, in short, a vendor quote, breaking down the make, model and cost.
- Satellite Distance Learning. installation costs, what components compose that ? I'll need a vendor quote breaking down the costs, listing model numbers, make.
- Wireless LAN - one time costs, what are they composed of? I will need another vendor quote with the cost breakdown, listing costs, model numbers and make.
- Installation/configuration of Internet Access dedicated services - one time cost, what is this composed of? can you have them provide a vendor quote or itemized breakdown for the monthly access and it's installation?

The other major issue is the discrepancy between discount rates in our database and what certain applications are requesting. The attached list has certain schools (highlighted in darker print) that are requesting a discount rate that our database cannot validate.

For SLD to update its database, can you state for me how these entities determined their 90% discount rate request?

I will need the following information for each entity:

A letter on the school letterhead stating the following:

- number of matriculated students.
- number of students currently eligible for free/reduced lunch program
(how was this determined, were surveys or applications distributed to the student body?)
- number of applications/surveys distributed to students
- number of applications/surveys returned completed

please attach a copy of a sample returned survey/application. This letter must be signed by a third party (principal/nutrition director).

I am also attaching the following: a set of questions for the routers and other equipment that is included in each one of the Internet Access Funding Requests of these applications. Please fill out for each and sent these back to me via fax. The same applies to the other attachment "Remote Access Router" certification which is to determine whether the equipment will be used in an eligible location.

Attach: HITN Cost Breakdown Per SLD 3rd Further Request.doc
Subject: re fax sent on september 20, 2002 , Private Schools
 Dear Mr Arauz

1-On your fax dated september 20, 2002, you have requested information for the Internet Access dedicated services. Please find attached the information we had previously sent you

2-Regarding that same fax, you mention the issue of the discrepancy between discount rates in the data base and what certain applications have been requesting. Please note that we have sent you an email today, september 27, 2002 with the subject request for time re discount level issue, regarding this issue.

3-With respect to the supplemental information regarding the telecom funding request with PRT, we confirm again that this is just for basic local and long distance telephone services.

4- Regarding this same FAX the set of questions you attached for the routers, please find the response that applies for each of the institutions for which you requested said information.

4-1- Is the equipment directly related to the end- to- end provision of Telecommunications or Internet Access Services?

yes

4-2- Will the leased equipment be provided by the same SPIN that provides the associated Telecommunication Service or Internet Access?

yes

4-3- Will ownership of the equipment transfer to the school or library in the future?

no

4-4- Does the relevant contract or lease include an option for the applicant to purchase the equipment?

no

4-5- Does the relevant contract or lease stipulate that the applicant will have exclusive use of the equipment?

no

4-6- Will the leased equipment at the applicant site be used for any purpose other than the receipt of the eligible Telecommunications Services or Internet Access of which it is a part?

no

4-7- Will the schools or library internal data communications network function without dependence on the equipment?

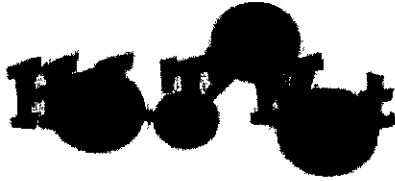

yes

4-8- Does responsibility for maintaining the equipment rest with the service provider?

yes

5- Regarding the Lan certification that you attached they have all been already addressed and sent to your attention.

Annex A Services Description 3rd Further Supplemental Information

Dedicated Internet Access Services

This service consists of two-way high speed, 2Mbps full time Internet backbone connectivity delivered to the customer over the HITNet Satellite network to the customer's transmit/receive earth station. The service charges consist solely of charges associated with the raw Internet bandwidth made available by HITNet for the Institution's use.

**Monthly Recurring Charge for 2Mbps HITNet High Speed Internet Access Service
= \$2,925**
